Plant membrane transport--the current position : proceedings of the Eighth International Workshop on Plant Membrane Transport, Venice, Italy, 25-30 June, 1989 /. Other Authors: International Workshop on Plant Membrane Transport, Dainty, Plant membrane transport--the current position : proceedings of the . Remainder of title, the current position : proceedings of the Eighth International Workshop on Plant Membrane Transport, Venice, Italy, 25-30 June, 1989 /. Protoplasts 1983 : poster proceedings : 6th International Protoplast . Plant membrane transport--the current position : proceedings of the Eighth International Workshop on Plant Membrane Transport, Venice, Italy, 25-30 June, 1989. QK725 . to soil salinity 30 Jun 1989 . Plant membrane transport: the current position : Proceedings of the Eighth International Workshop on Plant Membrane Transport, Venice, Italy, Venice - marelibri Plant membrane transport : the current position : proceedings of the Eighth International Workshop on Plant Membrane Transport, Venice, Italy, 25-30 June, 1989 . (8th : International Workshop on Plant Membrane Transport 1989 : Venice, Plant Membrane Transport--The Current Position: Proceedings Of . membrane, to those manifested at the whole-plant . growth, increased uptake and transport of K⁺ or reduced Na⁺ NaCl and CaSO₄.2H₂O to eighth lot of soil that Membrane Transport: The Current Position. In: Proceedings of the Eighth International Workshop on Plant Membrane Transport, Venice, Italy, 25-30. 0444813284 Plant Membrane Transport by editors, J. Dainty 14. Plant membrane transport--the current position : proceedings of the Eighth International Workshop on Plant Membrane, Venice, Italy, 25-30 June, 1989 Osmotic stress and abscisic acid reduce cytosolic calcium activities . 30 Jun 1989 . Plant membrane transport : the current position : proceedings of the Eighth on Plant Membrane Transport, Venice, Italy, 25-30 June, 1989. International Workshop on Plant Membrane Transport (8th : 1989 : Venice, Italy). ??? ?? ??? - RISS ?? ?? Plant Membrane Transport--The Current Position: Proceedings of the Eighth International Workshop on Plant Membrane, Venice, Italy, 25-30 June, 1989. Plant Membrane Transport--The Current Position: Proceedings of . . Membrane Transport: The Current Position Proceedings Of The Eighth International Workshop On Plant Membrane Transport, Venice, Italy, 25-30 June, 1989 Salinity: Environment — Plants — Molecules — Google Books Result International Air Power Review Volume 25 . Plant Membrane Transport--The Current Position: Proceedings of the Eighth International Workshop on Plant Membrane, . Venice, Italy, 25-30 June, 1989 pdf ebook 26sl28 free download By International Workshop on Plant Membrane 1989 (Venice, . Italy), Dainty, Jack 26sl28. Sodium-calcium interactions under salinity stress 205 . - CiteSeer Plant Membrane Transport--the Current Position: Proceedings of the Eighth International Workshop on Plant Membrane Transport, Venice, Italy, 25-30 June, . Growth and ion accumulation of two rapid-cycling Brassica species . Plant membrane transport--the current position : proceedings of the Eighth International Workshop on Plant Membrane, Venice, Italy, 25-30 June, 1989 / editors, . Plant membrane transport--the current position Continue to full page - SearchWorks - Stanford University Among them most of the crop plants are very sensitive to salt stress. Although the exact information In Plant membrane transport: The current position. In: Dainty J, de Michelis MI, Rasi-Caldogno F, editors. Proceedings of the eighth international workshop on plant membrane transport, Venice, Italy, 25-30 June 1989. Membranes - CNR Online library Catalog - College of Natural . Plant membrane transport--the current position: proceedings of the Eighth International Workshop on Plant Membrane Transport, Venice, Italy, 25-30 June, 1989. Fusicocin Counteracts the n-Ethylmaleimide and Silver-Induced . Plant

membrane transport : the current position : proceedings of the Eighth International Workshop on Plant Membrane Transport, Venice, Italy, 25-30 June, . 9780444813282: Plant Membrane Transport: The Current Position . Plant Membrane Transport The Current Position: Proceedings of the Eighth International Workshop on Plant Membrane Venice Italy 25 30 June 1989 . Elsevier Plant Membrane Transport--the Current Position . - Google Books Plant Membrane Transport--The Current Position: Proceedings of the Eighth International Workshop on Plant Membrane, Venice, Italy, 25-30 June, 1989. Plant membrane transport: the current position : Proceedings of the . direct Na-Ca interactions at the surface of the plasma membrane and subsequent . The current view is that a biochemical loosening of Plant Membrane Transport: The Current Position. Proceedings of the Eighth. International Workshop on Plant Membrane Transport, Venice, Italy, 25-30 June 1989, Elsevier. Science Plant Membrane Transport--The Current Position: Proceedings of . *Egeria densa* Planchon plants were grown in flowing tap water in a greenhouse. The electric current generated by the O₂ consumption was applied to an mV recorder connected to a .. Proceedings of the Eighth International Workshop on Plant Membrane Transport, Venice, Italy, June 25–30, 1989; Bellando M, Sacco S, Environmental Adaptations and Stress Tolerance of Plants in the . - Google Books Result In Plant Membrane Transport: The Current Position. Proceedings of the Eighth International Workshop on Plant Membrane Transport, Venice, Italy, 25–30 June 1989 (eds J.Dainty, M. I., deMichelis, E.Marré & F.Rasi-Caldogno) pp. 681–682. Cytosolic calcium and pH signaling in plants under salinity stress Plant Membrane Transport--The Current Position: Proceedings of the Eighth International Workshop on Plant Membrane, Venice, Italy, 25-30 June, 1989. J Dainty - GetTextbooks.com Plant membrane transport : the current position : proceedings of the . 11 Jun 2015 . Plant and Soil (Impact Factor: 2.95). 05/1993; 153(1):19-31. DOI: 10.1007/BF00010541. ABSTRACT. The response of two rapid-cycling 9780444813282 - Plant Membrane Transport--The Current Position .
